

Trying treatment without success? Here's your discussion guide.

Here are some questions to help you figure out next steps with your fertility specialist.

- Can you help me understand why it hasn't worked so far?
- Are there any new tests we should do?
- Is there anything in my results that looks off?
- Could stress, diet, or lifestyle be affecting this?
- Should we try a different medicine or treatment plan?
- How many more times should we try before changing paths?
- What's a good plan moving forward?
- What are other options if this doesn't work?
- Is there anything I should be doing differently between treatments?
- How are my chances now, compared to when we started?
- How much will this additional testing and/or treatment cost?
- Do you offer financial options for treatment/testing, or a coordinator to walk me through cost and coverage?
