

# What to ask your fertility specialist

**Have you tried treatment but haven't seen success? Here are some questions you can ask that will help figure out next steps with your fertility specialist.**

- Would you recommend trying my current treatment again or making any changes to my treatment plan?
- What are my other treatment options?
- What can I expect this new treatment process to be like?
- What impacts can I expect this new treatment to have on my day-to-day life?
- Will I need additional testing? If so, can you walk me through which tests I'll need?
- Will I need additional medication? If so, can you walk me through which medication I'll need?
- How much will this additional testing and/or treatment cost?
- Will this additional testing and/or treatment be covered by my insurance?
- Do you offer financial options for treatment/testing, or a coordinator to walk me through cost and coverage?
