

What to ask your fertility specialist

Haven't started treatment yet? Here are questions that can help get the conversation started.

- Can you help me understand my test results?
- What are my best treatment options?
- Can you tell me about your clinic's success rates for the different options you provide?
- Based on my test results/pre-existing conditions, do you see any problems for certain treatment options?
- What lifestyle factors may impact the success of my treatment options?
- What can I expect the treatment process to be like?
- What impacts can I expect treatment to have on my day-to-day life?
- How should I prepare for my treatment?
- Will my insurance pay for treatment? If not, how much will it cost?
- Do you offer financial options for treatment, or a coordinator to walk me through cost and coverage?
